(i.e., Category 5 Impairments - this represents the Section 303(d) List)

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Notes:

- 1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.

(i.e., Category 5 Impairments - this represtents the Section 303(d) List)

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

- 1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.

(i.e., Category 5 Impairments - this represents the Section 303(d) List)

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Notes:

- 1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.

(i.e., Category 5 Impairments - this represents the Section 303(d) List)

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

N----

- 1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.

(i.e., Category 5 Impairments - this represents the Section 303(d) List)

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Notes.

- 1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.

(i.e., Category 5 Impairments - this represents the Section 303(d) List)

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Notes.

- 1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.

(i.e., Category 5 Impairments - this represents the Section 303(d) List)

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Notes:

- 1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.

(i.e., Category 5 Impairments - this represents the Section 303(d) List)

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Notes:

- 1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Notes.

- 1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.

(i.e., Category 5 Impairments - this represents the Section 303(d) List)

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Notes.

- 1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.

(i.e., Category 5 Impairments - this represents the Section 303(d) List)

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Notes:

- 1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.

(i.e., Category 5 Impairments - this represtents the Section 303(d) List)

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

N----

- 1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.

(i.e., Category 5 Impairments - this represents the Section 303(d) List)

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Notos.

- 1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.

Notes.

- 1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.

- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.

(i.e., Category 5 Impairments - this represents the Section 303(d) List)

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Notes.

- 1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.

(i.e., Category 5 Impairments - this represents the Section 303(d) List)

(Excluding Fish/Shellfish Consumption Advisories due to Mercury - see Note 3)

Notes.

- 1. See the Consolidated Assessment and Listing Methodology (CALM) for definitions and details regarding how this list was developed.
- 2. This list is sorted by Waterbody Type and then Assessment Unit ID.
- 3. By this note, all surface waters in New Hampshire (which are divided into over 5000 Assessment Units) are also included on this list due to statewide fish/shellfish consumption advisories issued because of mercury levels in fish/shellfish tissue. To keep the size of this list manageable, mercury impairment for fish/shellfish consumption are not shown below.
- 4. TMDL stands for Total Maximum Daily Load study. TMDL schedules are subject to change as funding and resources become available.
- 5. Waters presented on this list may also be threatened or impaired by other pollutants or nonpollutants that do not require a TMDL.
- 6. TMDL Schedules and Source Names are blank in the case of newly documented impairments. This information will be provided on the final 303(d) list.
